DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-2 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The claims are replete with functional and/or operative errors too many to repeat in detail, which render the claims unclear and confusing. Some examples are as follows: the phrases “seating understanding...adapted to shape of body (A)”, “sliding feely on the level of knees (T1) and on the level of ankles (T3) and “where the user is and swiveling freely by rotation on the basis fixes”, renders claim 1 indefinite. Regarding claim 2, applicant is reminded that the claims should be in one sentence format, and the phrase “Any modification...involves a modification of the axis of alignment...same parallelepiped following claim 1, involving the rocker renders the claim indefinite. Applicant needs to clarify the claim language as to what are the metes and bounds of the claimed invention.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 3636

4. Claims 1-2 so far as definite are rejected under 35 U.S.C. 102(b) as being anticipated by Manuel. Manuel shows the use of a suspended seat (10) whereby the height of the headrest (50) and footrest (44) are able to be adjusted due to the "deformation" of a parallelepiped base which forms deformable equilateral quadrilaterals (see Fig. 2).

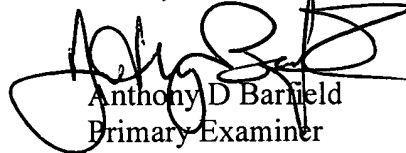

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Reference Nos. 261,336, 6,247,753, and 6,398,298 show features of the claimed invention.
